

Dr. Nola Etkin

Nola Etkin is the Dean of Science and a Professor of Chemistry at the University of Prince Edward Island, where she has taught Organic Chemistry and conducted research in Organometallic Chemistry and Catalysis since 1997. Her research has involved the development of new catalysts aimed at making specialty plastics with enhanced physical properties and specialty applications. More recently, she has turned her focus to improving methods of separating and recycling plastics with the goal of reducing the amount of plastics entering our landfills and oceans.
