

## **Dr. Rune Storesund**

Dr. Storesund is the Executive Director of UC Berkeley's Center for Catastrophic Risk Management. His research expertise is on safety and reliability of critical infrastructures, with a specialization on leveraging uncertainty as a risk-reduction resource. He is the co-founder and CEO of the non-profit SafeR3 (Safety, Resilience, Reliability, and Risk-Reduction), which offers Risk and Crisis Management education, technology development, and innovation to maximize enterprise risk management for Critical Infrastructures. Dr. Storesund is also the CEO of Storesund Consulting (a niche forensics and engineering consultancy); Storesund Construction (a heavy civil construction company specializing in construction of water storage and distribution systems); and NextGen Mapping (a software development company pioneering state of the art cloud computing tools). He is also an adjunct professor at Memorial University in the Civil Engineering Department.
